

PHARMACEUTICAL REFRIGERATOR

SPR-V02G

SARIFAMED
MEDICAL SOLUTION FOR FUTURE

Good Temperature

Good Insulation

Automatic defrosting system

Non CFC

Various Alarm System

pharmaceutical refrigerator (often called a pharmacy fridge or vaccine refrigerator) is a medical-grade cold storage unit specifically engineered to meet the stringent requirements for storing pharmaceuticals, medicines, and, most importantly, vaccines.

Glass Door with adhesive gasket

Protects samples and product temperature resistance.

High density polyurethane foam insulation

With an insulation thickness of ± 70 mm, it provides a good low (cold) value to maintain a cold temperature for a long time.

Automatic defrosting system with hot gas provides homogeneity and stability, accurate temperature precision

Temperature Alarm System

High and low temperature alarm system for safe sample storage, door opening for temperature control in the room.

Non-CFC/HCFC cooling system.

The compressor and refrigerant used are more environmentally friendly

MODEL

KPR-V02G

(Approximately W x D x H mm) Outer	$\pm 680 \times 840 \times 1625$
Weight (Approximately)	± 135 kg
Capacity (Approximately)	300 L
Shelf	3 EA
Controller Display	7" full touchscreen
Temperature	2.0°C to 8.0°C
Temperature Alarm	Low-High, Audible and Visual alarm
Door	One Door
Circulation	Fan
Defrosting Technique	Automatic defrost with selenoid
Safety	Over & Under Temp. Alarming, Thermal protector, Safety door lock
Electric Supply	220 \pm 10 VAC, 50/60 Hz

Didistribusikan oleh:
PT. Pelangi Rapha Semesta
Komplek Nusantara Golden Blok D No. 03A-5,
Desa/Kelurahan Teluk Tering Kec. Batam Kota,
Kota Batam, Provinsi Kepulauan Riau, 29461

Diproduksi oleh:
PT. Kalmed Manufaktur Indonesia Jl.
Raya Narogong, Kembang Kuning,
Kec. Klapanunggal, Kabupaten Bogor,
Jawa Barat 1671
